SEAMING ACCESSORIES

ezSEAM 50 KIT

The ezSEAM 50 seaming kit comes complete with a 4L green synthetic turf adhesive, 50' linear feet of seaming tape and instructions.

SEAMING GLUE

This 4L green synthetic turf adhesive is a single part, moisture cure urethane adhesive designed specifically for bonding various substrates to the backing of artificial turf. SYNMENT is the highest quality turf adhesive available, giving every contractor and installer the opportunity to experience a safe and successful installation!

SEAMING TAPE

Featured as a double-sided non-adhesive, our seam tape is 12 inches wide and works great for any synthetic turf seaming process. Seaming tape is available at any custom length with a maximum length of 328 feet per roll.

SUPERSEAM

With the challenges that synthetic turf installers face everyday when it comes to synthetic turf seam integration. SUPERSEAM is the answer! The Superseam is made of very high strength Aluminum has great hardness, tensile and fatigue strength. It also is lightweight and can withstand high stress for its longevity in miles of Superseaming.

BASE ACCESSORIES

PLAYGROUND FOAM PADDING

PlayLite™ panels provide superior drainage and impact absorption necessary for safe outdoor and indoor play areas. Manufactured in Canada, our Play-Lite™ panels are available in different thicknesses, eliminating the use of an expensive aggregate layer. PlayLite Play Products are made from 100% recycled materials, which help you obtain LEED® Credit for your projects

ezDRAIN

ezDrain is designed as a technically advanced drainage for synthetic turf applications. It consists of a heavy duty sheet cupaged under heat and pressure to form a high compression, high flow drainage core which is then cut into separate sheets to allow for expansion and contraction and bonded to a layer of non-woven fabric.

ROOFTOP AIRFIELD

AirField Systems is the leading provider of synthetic drainage for sustainable sports fields and rooftop applications. The AirDrain Systems 100% vertical and horizontal drainage capabilities eliminates the need for traditional base drainage systems, such as herringbone trenching or flat pipe etc. only needing perimeter or exit drains. -

GEOTEXTILE 4.2oz

4.2 oz. woven, needle punched, polypropylene fabric designed for professional and commercial use. MANUFACTURED to the highest standards for the professional contractor or retail consumer who demands high grade commercial products.
